

Hubbardton and Lower Poultney River Clayplain Forest Restoration Plan

- Study Area
- Clay Soils
- Forest
- Open, Non-clay soils
- Potential Clayplain Forest Fragments
- VT Heritage Element Occurance Clayplain Forest
- Field Identified Clayplain Forest
- 30 Largest Clayplain Forest Fragments

Map 3. Thirty Largest Clayplain Forest Fragments

1:64,094

Notes:
 Potential clayplain forest fragments are defined by the intersection of clay soils and forest layers. Field identified clayplain forests fragments are clayplain forest fragments that have been identified by TNC ecologists. The 30 largest clayplain forest fragments are a subset of the potential clayplain forest fragments layer and are ranked according to acreage (rivers were not considered a dividing feature).
